LIQUIP VICTORIA
THE HOME OF Fuelcraft

Service Station Equipment

Your retail fuelling supplier for Above & Below Ground fuel storage and dispensing equipment

Here at Liquip Victoria we have access to OPW's outstanding range of Service Station Equipment products. Our range of OPW Petrol Station products includes solutions for conventional:

- > Diesel & ULP,
- > Ethanol & Biodiesel,
- > DEF / AdBlue and
- > Alternative fuels

as well as a complete portfolio of solutions for **Above Ground Storage Tanks**. It also includes a wide range of **Below Ground** solutions including **Piping & Containment Systems** and **Underground Storage Tank Equipment**.

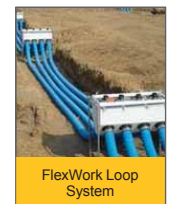

WHY CHOOSE OPW'S SERVICE STATION EQUIPMENT OVER OTHER BRANDS?

OPW designs, manufactures, tests and provides components and products to protect the

environment and the consumer at retail and commercial fuelling sites for conventional and alternative fuels. Fuel retail and commercial operators also count on OPW to provide the best products to assist in the efficient and safe operation of their fuelling infrastructure. Liquip International, now owned by OPW, take their expertise in the fuel market and apply it to supplying OPW retail and fuel transfer solutions and equipment to the Australian market.

**OPW BELOW GROUND
PRODUCTS SERVICE STATION
EQUIPMENT**

OPW Fueling Containment Systems lead the way in the design and manufacture of the industry's most innovative and trusted Piping & Containment Systems and Underground Storage Tank Equipment. Offering the most integrated, environmentally secure underground fuel delivery system in the world, OPW's Below Ground products set the industry standard in performance and consistent reliability to help protect the well-being of people and the environment – today, tomorrow and into the future.

The OPW Below Ground range available from us include:

- > **Piping & Containment System**
FlexWorks, by OPW Fueling Containment Systems, the world's leading manufacturer of petroleum handling equipment, is a completely integrated underground fuel transfer and containment system. Designed to provide the highest level of dispensing performance, installation efficiency and containment protection, FlexWorks delivers cost-effective peace of mind for UST operators. The FlexWorks system solution consists of highly engineered components that are designed to operate in unison to ensure long-term system integrity and performance. Additionally, FlexWorks offers a high degree of flexibility to meet virtually any underground piping requirement.
- > **Underground Storage Tank Equipment**
OPW offers a wide selection of underground storage tank equipment. This equipment is designed to help protect the environment by providing fuel operations with spill containment manholes, manholes and monitoring equipment, fill pipe connection equipment, overfill prevention equipment and tank venting equipment.

**OPW ABOVE GROUND
PRODUCTS SERVICE
STATION EQUIPMENT**

OPW Fueling Components design and manufacture trusted and reliable **Dispensing Hardware**, and **Above Ground Storage Tank Equipment**. For unparalleled dependability, durability and reliability choosing OPW from Liquip Victoria is a smart choice.

The OPW Above Ground range available from us include:

- > **Standard Dispensing Equipment**
Product offerings include a wide array of conventional automatic nozzles and manual dispensing nozzles, breakaways, hose swivels, and swivel breakaways.
- > **Above Ground Storage Tank Equipment**
OPW manufactures a broad array of Above Ground Storage Tank equipment and fuel management equipment for fleet fueling and bulk storage applications. They are the first manufacturer to have its AST products receive CARB Certification to meet new AST EVR regulations. No other AST solution offers you the highest level of clean air protection and overall value as OPW.
- > **CleanEnergy Fuelling Products**
- > **Stage II Vapour Recovery Equipment**
- > **21st Century Green Innovations**
