SERVICE DRIVEN**

Workshop & Servicing

Enjoy 'good old fashioned' workshop service and delivery

Our state-of-the-art workshop and highly experienced team of sales, administration and workshop floor staff not only offer and deliver 'good old fashioned' Australian service and ingenuity, but also provide a complete range of customisation and repair services for Tanker Trucks, Fuel Terminals and Depots and Bulk Liquid Storage Tanks.

As a proud and key business partner to Liquip's Distributor Network we are an authorised reseller and installer of Liquip Equipment Parts and products. Our dedicated team of fully qualified engineers, mechanics,

boilers makers, electricians and fitters and turners offer years of experience and know how, allowing us to assist you with all your Road Tanker custom projects and servicing requirements.

To learn more about our:

- > **Custom design and manufacturing projects,**
 - > **Repair work & maintenance abilities and**
 - > **our workshop features and Accreditations,**
- along with how we can assist you with a wide and extensive range of Bulk Liquid Transfer solutions please refer to the other side of this leaflet.

CUSTOM PROJECTS

We're experts in the development, design and execution of high quality custom projects aimed at the safe, efficient and effective transfer of bulk liquids, especially petrochemicals. Many of these projects have been undertaken at our headquarters however we also deliver on-site solutions when it comes to the establishment or repurposing of Terminals and Depots and Bulk Liquid Storage Facilities.

Our dedicated team has many years of industry experience and the expert know how to supply custom fabricated solutions to what may appear to be at first impossible tasks. Utilising the latest equipment parts and products from Liquip and other suppliers, along with the necessary skilled trades people and engineers, no brief is ever too big or too small for us to deliver. And for each project we offer a range of support options, including local onsite support to phone based technical assistance should issues or questions arise.

REPAIR WORK & MAINTENANCE

Operating and maintaining equipment requires a large investment. We take great pride in our experience and ability to ensure your equipment is serviced or repaired to the necessary standards as fast as possible – without compromising on quality, to get you back operating in the shortest possible timeframe. This ensures you can once again start making returns on your investment.

At our headquarters we can repair and carry out maintenance on Tanker Trucks and Prime Movers used for the transfer of fuel derivatives, hazardous

liquids and food, as well as stationary storage tank equipment such as pumps, dispensers, fuel management systems and tank gauging systems. We also have a large range of spare parts on site that can be drawn upon to speed up the repair process.

And if you need work completed outside general business hours our after hours service division can work around the clock to complete any repairs and servicing off site at a facility or equipment location.

Our services include the Repair & maintenance of:

- > Prime Movers
- > Liquip Equipment & Components
- > Internal and External Barrel
- > Suspension
- > Tankers & Tanker Dispensing Systems
- > Meters & Diptronics
- > API and Drybreak Couplings
- > Electronics and Pneumatics
- > Overfill Systems
- > Pumps and Hose Reels (including reconditioning)
- > Bulk Flow Metering Systems (including Calibration & Certification)
- > Bowsers, Dispensers & Fuel Pumps

WORKSHOP FEATURES & ACCREDITATIONS

Our workshop holds all the necessary indoor and outdoor space for large Road Tanker and trailer maneuverability and storage. It is also fitted with latest tools and equipment to carry out custom and repair work services. Our extensive stock holdings of popular Liquip Equipment Parts and products (as well as other industry related parts and products)

enables work to be carried out in a timely fashion and avoids part ordering delays. This makes us a very nimble operation when it comes to emergency repairs and access to replacement products for implementation or purchase.

Our team of electricians, boilermakers, engineers, CAD designers, fitters and mechanics meet and hold the qualifications and accreditations required to carry out works including:

- > **Electrical Engineering**
(Hazardous Area Electrical work)
- > **Auto CAD Engineering of all fit-outs**
- > **Loading, Discharge & Blending Skids Design & Fabrication**
- > **Diptronic Road Tanker Systems installation**
- > **Tanker Upgrades**
- > **Re-Horse & Refit of Road Tankers**
- > **Specialised Custom Builds and Fit-outs of Road Tankers**
- > **Depot and Terminal Equipment & Systems design and construction**
- > **Self Bunded Storage Tank Pump & Fuel Management supply and installation**
- > **Tank Gauging Supply and Service**
- > **Flame Proofing of Prime Movers**
- > **Loading Arms & Overfill Systems design and construction**
- > **NMI Calibration for Tankers and Dispenses or Bowsers**
- > **Degassing management off site**
- > **SLP Inspections & Hydro-tests**
- > **Supply & testing of Fuel Delivery & Vapour Hoses**
