Mission Statement

At Liquip Victoria, our mission is to deliver safe, smart, and sustainable liquid handling and fuel transfer solutions—through innovation, expert service, and trusted partnerships. We are committed to supporting our customers across various industries, by providing turnkey systems that improve efficiency, ensure compliance, and stand the test of time.

Vision Statement

To be Australia’s leading provider of innovative, turnkey bulk liquid handling and fuel transfer solutions. Trusted for our unwavering commitment to safety, service excellence, and sustainable technology. Empowering industries nationwide to operate efficiently and securely.

Managing Directors Notice

As Managing Director of Liquip Victoria, I am proud to lead a business built on engineering excellence, technical capability and a strong commitment to Australian industry. For over a decade, Liquip Victoria has played a critical role in delivering reliable fuel handling, storage and dispensing solutions that support some of the most demanding industries across Australia.

Our strength lies in our people, our processes and our ability to deliver fit-for-purpose solutions. From design and fabrication through to installation, commissioning and ongoing support, we take a considered, end-to-end approach that prioritises safety, compliance and long-term performance. This approach enables our customers to operate with confidence, knowing their infrastructure is built to perform in real-world conditions

Liquip Victoria remains deeply committed to Australian manufacturing. By investing in advanced facilities, skilled trades and apprentices, we continue to strengthen local capability while maintaining the flexibility to adapt to evolving industry requirements. Our focus on continuous improvement ensures we remain at the forefront of innovation while delivering practical, dependable outcomes for our customers.

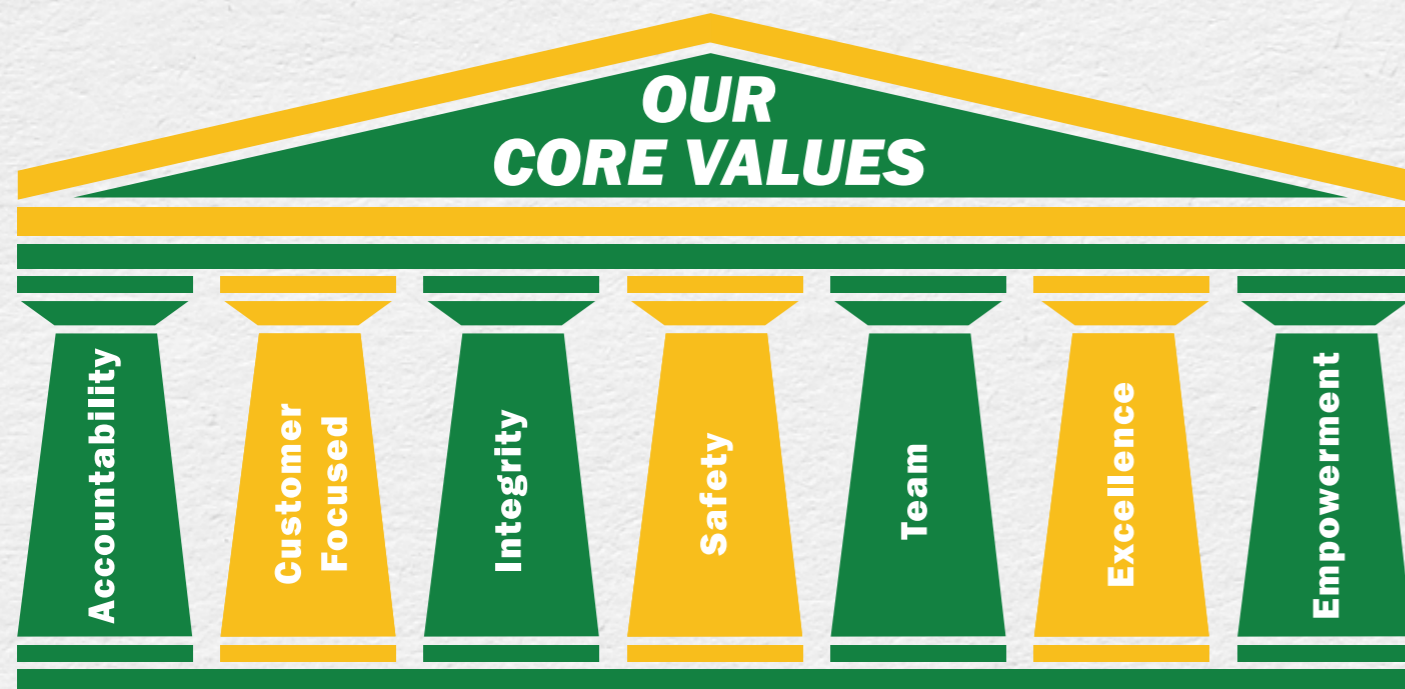

As we look to the future, our focus remains clear: to build trusted partnerships, deliver high-quality engineered solutions and contribute positively to the industries and communities we serve. I thank our customers, suppliers and, most importantly, our team for their ongoing commitment and support.

Jeff Borg
Managing Director

Core Values

Our core values form the foundation of everything we do, guiding our decisions, shaping our culture, and defining how we engage with our customers, partners, and communities. They set clear expectations for ethical conduct, accountability, and excellence, ensuring consistency in the way we operate and deliver value. By embedding these values into our everyday practices, we create a unified approach to business that builds trust, drives sustainable performance, and supports long-term growth. Ultimately, our commitment to these principles enables us to act with integrity, adapt with confidence, and achieve outcomes that align with our purpose and vision.

These values are more than guiding principles; they are actively lived across our organisation and reflected in how we lead, collaborate, and innovate. They empower our people to make responsible decisions, take ownership of outcomes, and continually strive for improvement. By aligning our strategy and operations with our core values, we foster a resilient and high-performing organisation that remains focused on delivering reliable, high-quality solutions while creating lasting value for all stakeholders.

“ To develop a culture that allows employee engagement, with the ability for the employee to help shape the company’s future direction.

Our Commitment to Safety

At Liquip Victoria, safety is more than a priority, it is a core value that underpins every aspect of our operations. We are committed to creating and maintaining a workplace where every employee, client, and partner can operate with confidence, knowing that robust safety protocols, continuous training, and proactive risk management are always in place.

By fostering a culture of vigilance, accountability, and continuous improvement, we ensure that safety is integrated into every decision, every process, and every project, reflecting our unwavering commitment to protecting people, property, and the environment.

We are proud to be ISO 45001 certified. This achievement reflects our ongoing commitment to keeping our team safe, exceeding health and safety standards, and building lasting trust with our customers and partners.

ISO 45001 is more than just a certification. It’s a demonstration of our dedication to reducing risks, protecting our team, and strengthening our business. For us, safety isn’t simply about compliance, it’s the foundation of everything we do.

ISO 45001 is a commitment we’ve made to:

- ▶ Keeping our team safe
- ▶ Meeting & Exceeding Health & Safety Regulations
- ▶ Building Trust with our clients & partners
- ▶ Reduce Risks
- ▶ Prevent incidents
- ▶ Ensure fewer accidents
- ▶ Strengthen workplace culture

As Safety Manager, our commitment to safety is fundamental to everything we do. We are dedicated to providing a safe and healthy working environment by proactively identifying and managing risks, complying with all relevant legislation and standards, and continuously improving our safety systems and practices. Safety is a shared responsibility across all levels of the organisation, supported through clear procedures, regular training, open communication, and strong leadership.

By fostering a culture where hazards are reported, lessons are learned, and people are empowered to speak up, we ensure the wellbeing of our employees, contractors, clients, and the communities in which we operate.

Legal Compliance & Safety Manager

Australian Made

Key Offerings

Liquip Victoria is proud to be an Australian manufacturer, designing and building high-quality fuel handling and refuelling solutions for critical industries both locally and globally. All products are engineered and manufactured under one roof at our Derrimut facility, ensuring full control over quality, safety and performance, while supporting Australian jobs and local expertise.

Our capabilities span a diverse range of applications, from rural and industrial fuel solutions through to highly specialised equipment for the aviation refuelling industry. This includes the manufacture of state-of-the-art aviation filter vessels, engineered to meet stringent international standards and deliver reliable, contamination-free fuel where safety and precision are paramount.

Within our locally manufactured portfolio, the Liquip Victoria Rural Range, including Farm Trailers and Farm Tanks, demonstrates our ability to design equipment specifically for Australian conditions. Built tough, safety-focused and available in a range of capacities, these solutions support efficient on-site refuelling and can be paired with world-class pumping and metering packages to suit individual operational requirements.

Proudly carrying the iconic Australian Made logo, Liquip Victoria's products reflect our commitment to local manufacturing, advanced engineering and long-term reliability, delivering solutions that perform in the field, on the tarmac and everywhere in between.

Engineering

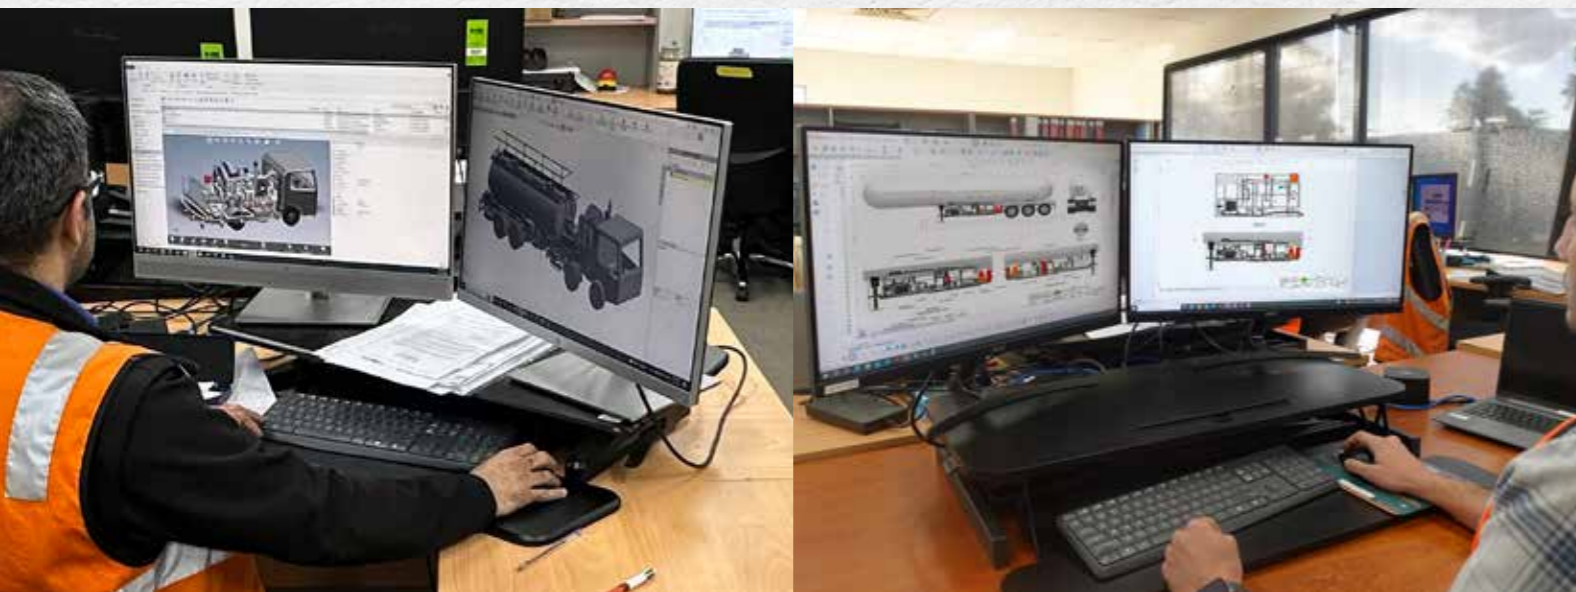

At Liquip Victoria, we are proud to present the depth of expertise and professionalism within our engineering department. Comprised of highly skilled Mechanical Engineers, Electrical Engineers and Technical Writers, the team manages every project from initial concept through to final delivery.

Our engineers bring extensive experience across a broad range of industries, including fuel handling, aviation, pressure vessels and advanced manufacturing. This expertise is underpinned by recognised qualifications and certifications such as HACD, NER, BLA, RPEQ and CPEng, ensuring the highest standards of compliance, safety and technical excellence.

Together, our engineering team delivers integrated, end-to-end solutions across multiple disciplines, with capabilities spanning several key areas, including:

- ▶ Mechanical & Electrical Design and Drafting: Developing detailed 3D models and drawings.
- ▶ Finite Element Analysis (FEA): Performing structural and performance simulations.
- ▶ Electrical Calculations: Ensuring compliance with industry standards.
- ▶ Fuel Pumping & Piping Solutions: Designing robust systems for fuel handling.
- ▶ Filter Vessel and Pressure Vessel Design: Meeting AS and ASME codes.
- ▶ PLC Software Development & Programming: Designing and implementing automation solutions.
- ▶ Hazardous Area Design: Classification, dossiers, and ensuring compliance with safety standards.
- ▶ Product Documentation: Preparing manuals, instructions, and technical documentation.
- ▶ Project Management: Delivering complete turn key solutions.
- ▶ P&ID Development: Creating Process and Instrumentation Diagrams.
- ▶ Pneumatic & Hydraulic Drawings: Providing detailed system designs.

At Liquip Victoria, we're driven by innovation and a passion for excellence. Our engineering team works tirelessly to overcome challenges, deliver world-class solutions, and shape the future of our industry.

Fuelling the Future

At Liquip Victoria, we see apprenticeships as a strategic investment in the future of Australian manufacturing. Apprentices are not only learning a trade, they are shaping the skills, capability and innovation of tomorrow's workforce. That is why we proudly support and develop emerging talent across a diverse range of disciplines, including electrical, auto-electrical and engineering fabrication.

Our passion for Australian-made solutions is deeply rooted in local skills and expertise. By nurturing the next generation of tradespeople, we help ensure that advanced manufacturing continues to thrive locally, sustainably and competitively.

Our commitment extends well beyond formal training. Apprentices at Liquip Victoria gain genuine, hands-on experience working on real-world projects, guided by experienced professionals who are deeply invested in their development. Our team takes mentorship seriously, providing structured guidance, knowledge sharing and support that empowers apprentices to grow with confidence, both professionally and personally.

Through this approach, we do not just build skills. We build careers, strengthen our industry, and reinforce our long-term commitment to Australian manufacturing excellence.

We have dedicated apprentices who contribute in many aspects of our business while learning the skills required to manufacture our products. Our aim is to develop these young minds as the future for our business.

Jeff Borg
Managing Director

Investing in the Future

Trusted by

At Liquip Victoria, we understand that investing in the future of our manufacturing capabilities is not just a strategic decision; it is a responsibility to our team, our clients, and the industries we serve. By introducing large overhead cranes, advanced robotic welders, and other state-of-the-art fabrication equipment, we are empowering our workforce to work more efficiently, safely, and with unparalleled precision. These investments allow us to take on more complex projects, deliver consistently high-quality solutions, and remain at the forefront of innovation in both the fuel and aviation industries. Ultimately, it is about building a foundation today that ensures our continued growth, competitiveness, and reputation as a trusted manufacturer for decades to come.

Equally important is the impact these advancements have on our people. By equipping our team with cutting-edge tools, we are fostering a culture of innovation, skill development, and pride in craftsmanship. Our engineers, fabricators, and technicians can now push the boundaries of what is possible, producing solutions that meet the highest standards while reducing physical strain and risk. Investing in technology is therefore an investment in our people, the heart of our company, and in the long-term success and sustainability of our business.

These investments mean more than just advanced machinery. They translate into faster project turnaround times, greater consistency, and solutions that are engineered to last. With the precision and efficiency that modern equipment delivers, we can take on larger, more complex projects while maintaining the high-quality standards our customers expect. Ultimately, our commitment to innovation ensures that every product leaving our facility is reliable, safe, and designed to meet the evolving demands of the industries we serve.
