## Bulk Liquid Storage & Terminal Solutions

We design and build permanent and temporary fuel storage and dispensing solution systems

Liquip Victoria has many years of experience in the Australian and global market supplying products and systems for the safe and efficient storage, loading and unloading of critical, hazardous bulk liquids.

These products include **Loading Arms, Loading Skids, Self Bunded Tank Solutions, Swivel Joints, Sight Flow Indicators, Quick and Dry Disconnect Couplers, Safety Breakaways** and more.

With 30 years of combined fuel industry experience it provides a wealth of engineering excellence we can draw upon to custom design, manufacture and supply the most cost-effective solution to meet your requirements. All electrical work, fuel management interfaces, electronic overfill and tank gauging, valve control and piping, site layout in 3D drawings can be completed by Liquip Victoria's team in house, making us a truly one stop shop for Bulk Liquid Storage and Terminal Solutions.

### BACKED BY LIQUIP

For many years we've been delivering cost-effective, specialist petrochemical dispensing and storage systems for the bulk liquid transport industry. Backed by Liquip

Equipment Parts, we use and have access to some of the world's best fuel transfer, storage and monitoring systems available.

### LOADING ARMS

Ideal for the safe loading and unloading of petroleum products, chemicals and liquified gases. We also offer the ability to assist in the design and manufacture of custom Loading Arms.

### OVERFILL PROTECTION

Here at Liquip Victoria we supply a complete line of Liquip Overfill Protection products along with their rack monitors used in bulk liquid loading and unloading operations. These monitors can detect the type of sensor in the transport, the state of the liquid in the tank, an overfill situation and/or verify the grounding condition.

### SELF BUNDED STORAGE TANKS

We specialise in above ground Self Bunded Tank solutions built to Australian Standards, complete with dispensing equipment, pumps, metering, fuel management and more.

### METERING, DISPENSING & GAUGING

Metering and managing your liquid bulk storage liquids is paramount to inventory control and easily accomplished with Liquip's range of meters and fuel managements systems. Liquip's own unique DFV controller, designed to work with both bulk storage tanks and road tankers, is the most technically advanced Register and Diptronic unit available on the market. Also available are OPW's Nano and Integra Tank Gauging Systems. These units are globally recognised and are coupled with controllers and meters that will simplify managing your petrochemical storage in a depot or small bulk transfer operation.

### VAPOUR RECOVERY

For loading and unloading of bulk liquids, vapour recovery is critically important in eliminating as many hydrocarbon or chemical vapours entering the atmosphere as possible. Controlled by a closed

loop vapour system we supply a quality range of Liquip Vapour Recovery Couplers, Adaptors and systems to keep the environment clean and safe.

### LOADING SKIDS

We can provide complete turnkey truck loading stations (gantries). Starting with an assessment of your requirements, through consultation we provide the most productive & cost efficient solution.

### LOADING SYSTEM COMPONENTS

We offer the most complete line of loading systems for today's bulk liquid loading and unloading requirements. Whether the application involves the moving of petroleum products, liquified gases, asphalt, solvents or hazardous/corrosive chemicals into and out of Road Tankers, Railcars, stationary tanks or drums, we are the preferred supplier of these Loading System Components throughout Victoria.
